

# STUDENT GUIDE

Each student will receive a Student Guide as a reference source. This comprehensive reading supplement contains information and activities that will help students learn, understand, and apply CCSS. This student friendly guide can be used to supplement any reading or writing curriculum. Inside the guide you will find reading and writing Graphic Organizers to help students track key ideas and details while reading and writing. In addition, there are word lists to help students recognize commonly used words in text, punctuation marks and samples on how to use them, word choice ideas, and citing references, the processes of reading and writing, and student checklists. The student guide is a resource for the student to use during focused reading and writing instruction.

Another resource in the student guide will help the student understand and implement the reading and writing processes. My Ed Buddy includes a wide array of word choice ideas that students can use to write, revise, and edit their text. My Ed Buddy also includes writing checklists that support the different types of writing required of CCSS so that students can edit their own papers, peer edit, or edit in collaboration with others.
